

CabParts Online – Using the Custom Items Order Form

What if CabParts Online does not include a cabinet I need, or I cannot adjust an existing cabinet to get the results I want?

For example, I want to remove the dado and back altogether, or extend the right side up and the left side down, or I want to drill for pulls or locks, but those options are not available?

Answer: If CabParts Online doesn't include the specific cabinet or adjustment you need, follow these steps:

1. First, use CabParts Online for what it can do, and for those really special or custom items, use the separate “**Custom Items**” order form.
2. Email the form to contact@cabparts.com or FAX it to us at 970-241-7689.
3. After receiving your “paper” order, we'll prepare an estimate for your approval.
4. This Custom Item Order will be handled separately. If it is to be part of an online order, it will be assigned the same Order Number with an Add-on (e.g., “Order # 856-A1”).
5. Let us know if you want everything shipped together or separately once completed.

CABPARTS ONLINE CUSTOM ITEM ORDER 1
